10 minutes, 4 interactive experiments

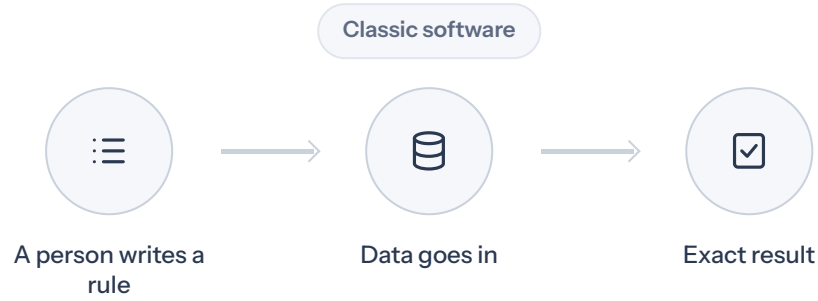

A first step into AI

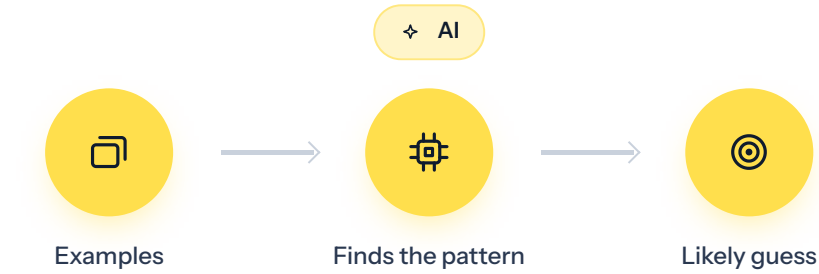

Try it instead of reading about it. The basics
of using AI in the right places at work.
This PDF is the printed version of an interactive guide. To run
the experiments yourself: **halilneed.agency/guides/first-step/**

Step 1 of 4

What is AI?

Nobody writes the rule. It finds the pattern in examples.

How does ChatGPT write? Pick the next word yourself

Let's move the meeting to

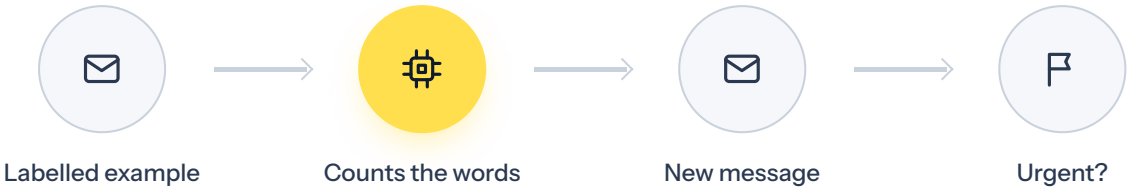

tomorrow	58%
Monday	27%
next week	14%
eggplant	~0%

⚠ It writes what is likely, not what is true. Checking is your job.

Step 2 of 4

How does it learn?

Add examples and watch it change on six messages it has never seen.

6
/ 6 correct

The model has seen **12** examples

Customer portal will not open, complaints are rising	✓ Urgent
Invoice payment stuck, deadline tomorrow morning	✓ Urgent
Today the department lunch is on, attendance optional	✓ Not urgent
Training registration opens next week	✓ Not urgent
System error, transactions halted	✓ Urgent
New version of the slide template attached	✓ Not urgent

pushes to urgent pushes to not urgent

12 examples: a more varied example fixed it

- 2 examples: the model is unsure about most messages
- 4 examples: it thinks anything with “today” is urgent
- 8 examples: the mistake stays, a bias in the data
- 12 examples: a more varied example fixed it

Step 3 of 4

Where does it fit at work?

Ten tasks. Make your call on each one.

✓ Fine ⚠ Careful ✕ Don't

An action list from meeting notes

✓ Fine | ⚠ Careful | ✕ Don't

✓ **Fine.** Turning messy text into structure is exactly what it is good at.

Summarising a long email thread

✓ Fine | ⚠ Careful | ✕ Don't

✓ **Fine.** One of its strengths. With personal data, use an approved tool.

Getting an Excel formula written

✓ Fine | ⚠ Careful | ✕ Don't

✓ **Fine.** Fast. Check a few rows by hand.

Pasting a customer complaint with ID number into a personal chat account

✓ Fine | ⚠ Careful | ✕ Don't

✕ **Don't.** Personal data: mask it first and use an approved tool.

A presentation outline and title ideas

✓ Fine | ⚠ Careful | ✕ Don't

✓ **Fine.** It gets you past the blank page.

Asking for a competitor's current market share

✓ Fine | ⚠ Careful | ✕ Don't

⚠ **Careful.** It can make numbers up. Ask for sources and open them.

Letting it set an employee's performance rating

Fine | Careful | **Don't**

Don't. Decisions about people stay with people.

Explaining a contract clause in plain words

Fine | **Careful** | Don't

Careful. Good for understanding, not a legal opinion.

Translating an email with nothing confidential in it

Fine | Careful | Don't

Fine. One of its strengths. Check the terms on a last read.

Sending a financial table without checking it

Fine | Careful | **Don't**

Don't. Number errors are common. Check every figure.

Step 4 of 4

The right flow

AI in the middle, you at both ends.

The draft is the AI's, the decision is yours

Mask personal data first

Check numbers and sources

Give examples, get better results

Next: a business unit's first AI model

From one task to a pilot you can measure.
